Introduction

Welcome to Quick Shopping

Quick commerce is a model that allows customers to receive their orders within an hour of placing them. It's usually used for small orders, rather than large grocery orders..

Key Features of Quick Shopping:

1 [3:03 PM, 11/14/2024] Atul Raj Singh: E-commerce websites

These digital storefronts allow businesses to sell products and services online. Customers can browse products, read reviews, compare prices, and make purchases.

E-commerce benefits

E-commerce can help businesses reach a wider customer base, and can also be cheaper than running a physical store.

E-commerce security

It's important to protect confidential information like credit card and bank account numbers. Digital signatures can help make this easier and safer.

E-commerce content regulation

Some online content is considered inappropriate or harmful, and there are concerns about the need for regulation. However, there are also counterarguments about the right to free speech and expression.

[3:04 PM, 11/14/2024] Atul Raj Singh: Fast delivery: Quick commerce offers fast delivery speeds and doorstep delivery.

Easy order tracking: Customers can easily monitor and track their orders.

Simple UI: Quick commerce platforms have a simple user interface.

Curated selection: Quick commerce offers a curated selection of products.

Order planning: Customers can reserve a time and day for their order delivery.

Delivery scheduler: Customers can schedule their delivery in advance.

Payment gateway: Customers can pay on the spot and get an instant receipt.

Membership: Some on-demand applications offer membership benefits such as free delivery

Benefits of Creating a Quick Shopping:

[3:05 PM, 11/14/2024] Atul Raj Singh: Lower Costs. Cost reduction is one of the key benefits of ecommerce websites that keep sellers

engaged in online selling.

[3:06 PM, 11/14/2024] Atul Raj Singh: Customer Data Insight.

Another benefit of selling products online is the ease of collecting, measuring, and acting upon data.

TECHNOLOGIES USED

Creating an engaging and functional websites like Quick Shopping involves utilizing technologies like HTML and CSS

In this case, I have used HTML and concepts of CSS (for designing) for building the quick shopping website.

HTML (Hyper-Text Markup Language):

- HTML is the standard markup language for creating Web pages
- HTML describes the structure of a Web page
- HTML consists of a series of elements
- HTML elements tell the browser how to display the content
- HTML elements label pieces of content such as "this is a heading", "this is a paragraph", "this is a link", etc.

CSS (Cascading Style Sheet):

- CSS describes how HTML elements are to be displayed on screen, paper, or in other media
- CSS saves a lot of work. It can control the layout of multiple web pages all at once
- External stylesheets are stored in CSS files
- It helps in designing the website by using properties like color, background-color etc.
- It is also used for giving animation effects, hover effects and many more.
- By using media queries, one is able to create responsive website which is done using CSS.

WORKFLOW

- > Start
- > Project Planning
- > HTML
- > CSS
- > Adding Images
- > Adding Various other features
- > Completing Frontend of the Website
- > End.

Working of Quick Shopping

Homepage:

When users visit the site, they land on homepage, which showcase about coe's, cuisines and many more.

Users can easily navigate through dif.

1. Clickable Features:

Whenever user click on the sun icon, the background color of the website changes to black.

And when the user clicks again it turns to grey background.

2. Hover Effects:

Whenever user moves the cursor over the navbar items, the border around the items appears in white color.

3. Responsive Design:

The website is designed to work well on both the desktops and mobile devices. This means users can browse comfortably, regardless of the device they are using.

4. Visual Appeal:

The website uses attractive colors, fonts, and layouts to make the browsing experience enjoyable and engaging for users.

Overall, the Food Eatate website make it easy to explore Eatate options, order online, and learn more about the brand's philosophy and community involvement.

Quick Shopping

[Home](#) [Items](#) [BUY NOW](#) [Contact](#) [About Us](#)

CONCLUSION

In conclusion, the quick shopping website project aimed to create a fast, user-friendly, and convenient online shopping platform for customers. Through this project, we successfully:

- Designed and developed a responsive and intuitive website interface
- Implemented a robust search and filtering system for easy product navigation
- Integrated a secure payment gateway for seamless transactions
- Developed features for quick checkout, order tracking, and personalized recommendations

The website offers a hassle-free shopping experience, allowing customers to quickly find and purchase products with minimal effort. With its fast loading speeds, mobile-friendliness, and intuitive design, this website provides an exceptional shopping experience for customers.

Future enhancements could include integrating AI-powered product suggestions, implementing a loyalty program, and expanding product categories to further improve the shopping

experience. Overall, this project demonstrates the potential for quick shopping websites to revolutionize the way we shop online.

REFERENCES

W3 SCHOOLS:

"W3Schools is a popular online platform that provides web development tutorials and references for various web technologies. It serves as a comprehensive resource for individuals who are learning or looking to enhance their skills in HTML, CSS, JavaScript, and other related technologies.

The website offers a wide range of educational materials, including beginner-friendly tutorials, interactive examples, and hands-on exercises. These resources are designed to help users understand the fundamentals of web development and gain practical experience. Users can learn about topics such as web design, front-end development, back-end development, database management, and more.
